

## WR406 Spring 2005 Potential Project Topics / Questions

1. Spatial distribution of snow around a tree: A tree's energetics
2. Snow structures in a continental sub-alpine environment
3. Snowpack stability below a slide surface
4. Parking lot glaciers
5. Club lighting and sound in an Igloo
6. Spatial representativeness of operational snowpack measurements
7. Comparing  $D_{100}$ -accumulation and  $D_{100}$ -melt with albedo considerations
8. Density of fresh snow
9. Snow accumulation and albedo variations associated with invasive vegetation on a grassland
10. How thick is the snow we ski on?
