RS 329
Rangeland Assessment
{1 Credit}
August 17-21, 2016

Join us for a week-long intensive field course intended to build skills in:
- Identification and mapping of land classification units (ecological sites)
- Assessment of soil and vegetation
- Use of state-and-transition models to interpret current and potential conditions

*Students integrate and apply knowledge of soils, plant communities and range management principles to assess, interpret, and describe current and potential future conditions on a management unit, and present their results in a professional oral and written report.*

Tuition: $419

**Course Prerequisite:** Background in ecology. Email [Sonya LeFebre](mailto:sonya.lefebre@ ColoradoStateUniversity.edu) for override information.

**Instructor:** Dr. Maria Fernandez-Gimenez, Dept. of Forest and Rangeland Stewardship
