Plan C Master’s Degree  
Department of Fish, Wildlife, and Conservation Biology  
Colorado State University

The Department of Fish, Wildlife, and Conservation Biology at Colorado State University is now offering a Plan C Master’s degree in Fishery and Wildlife Biology. The Plan C Master’s degree is a continuing education degree focused on people who have at least 5 years of professional experience, but wish to gain additional skills to remain competitive in the profession. The degree is a 36 credit, non-thesis degree. The interest and call for such a degree program has been made numerous times but few places have filled this need. The Department of Fish, Wildlife, and Conservation Biology at Colorado State University is uniquely situated to do so.

Targeted students: Targeted students are from State, Federal, and Non-governmental agencies as well as Private companies and Non-USA students.

Number of students: The degree program is limited to 5 students to be selected competitively from the pool of applicants.

Curriculum: Because the Plan C Master’s degree is a graduate degree, there is not a fixed curriculum. Rather, students enrolling in this degree program are encouraged to select the courses they need to remedy deficiencies in their training with guidance from an advisor.

Course Requirements: 36 credits required, with 24 credits from graded courses 500-level (graduate level) and above, with the remaining 12 credits from seminars and graded courses 300-level (upper-level undergraduate) and above.

Admission: For further information and to apply for admission to this program, please see this link [http://warnercnr.colostate.edu/fwcb-graduate-degrees/application-process-for-graduate-school.html](http://warnercnr.colostate.edu/fwcb-graduate-degrees/application-process-for-graduate-school.html) or contact the Department of Fish, Wildlife, and Conservation Biology, Colorado State University, Fort Collins, CO 80523.
