What is Geology?

The Geology major constitutes a broad curriculum that allows students to obtain a sound academic and practical basis for professional geosciences careers. Common private and public-sector careers include water, energy, mineral and other natural resources, geological hazards, regulatory management, and education. The major also provides a solid background for subsequent graduate training in specialized fields that include economic geology, hydrology, geophysics, environmental geology, resources management, public policy, and many other areas.

The Geology curriculum provides a technical background within the broader framework of a liberal education. Emphasis is placed on integrating field studies in the Rocky Mountains and elsewhere with on-campus classroom and laboratory work. In addition to a solid core in geology, students complete substantial course work in math, the physical sciences, communications, and the liberal arts that lead to effective quantitative, decision making, and communications skills. Four Geology major concentrations are offered: Environmental Geology, Geology, Geophysics, and Hydrogeology.

To access curriculum checksheets and advising information, please visit: https://warnercnr.colostate.edu/geosciences/undergraduate-study/.

Concentrations

ENVIRONMENTAL GEOLOGY

Environmental Geology prepares students to address the environmental implications of geologic processes and human effects on the earth. Graduates commonly find careers in environmental, engineering, and groundwater firms, and in government agencies.

GEOL 120 and 121 Exploring Earth: Physical Geology and Introductory Geology Laboratory

GEOLOGY

The Geology concentration covers general geology, emphasizing a practical and field-oriented approach that is suited to employment opportunities in the energy and mining industries and other traditional geologic fields. This concentration also provides a strong basis for graduate studies in geology.

GEOL 154 Historical and Analytical Geology

CHEM 111 and 112 General Chemistry I and Lab

CHEM 113 and 114 General Chemistry II and Lab

MATH 117, 118, 124 College Algebra I and II, Logarithmic and Exponential Functions

MATH 125 & 126 Numerical and Analytical Trigonometry

CO 150 College Composition

PH 141 Physics for Scientists and Engineers I

PH 142 Physics for Scientists and Engineers II

To view how courses will transfer to CSU, please go to: www.transferology.com. A student may apply 64 transfer credits from a regionally accredited 2-year institution toward their degree at CSU. There is no limit on the amount of credit that can be transferred from a regionally accredited 4-year institution. Only coursework completed with a grade of C- or better will be accepted in a transfer. Transfer grades and credits are not computed within the cumulative GPA earned at CSU. If coursework presented for transfer is over 10 years old, the academic department will need to review it for applicability towards degree requirements. Students must complete 42 upper-division (300-level or higher) credits, at least 30 of which must be taken at CSU, to earn a CSU degree.

Priority Courses
Before You Transfer

1. Review your major options online at https://admissions.colostate.edu/academic-programs/. If you are interested in learning more about the major programs in Warner College of Natural Resources, set up a time to talk with Jake Aglietti (jake.aglietti@colostate.edu).

2. Consider making a visit to CSU and/or WCNR. You can schedule a visit to campus at: https://admissions.colostate.edu/visit-campus/#transfer.

   - If you are transferring credit from a school outside of Colorado, you may request a Tentative Transfer Credit Evaluation with the Transfer Student Center once you have selected a major program. This evaluation will inform you of how your credits will work with your selected major. Please contact the Transfer Student Center at (970) 491-1858 or via the Transfer Student website through Admissions: https://admissions.colostate.edu/transfer/.

4. Apply for admission to CSU: https://admissions.colostate.edu/apply/transfer/.

CSU has a number of statewide articulation agreements and approved transfer guides. To view the agreements that are currently approved at CSU, please visit: https://registrar.colostate.edu/transfer-credit/agreements-guarantees/.

After You’ve Been Admitted...

Welcome to Warner!

1. Confirm your offer of admission and pay or defer your enrollment deposit.

2. Sign up for Ram Orientation. All transfer students are required to attend Ram Orientation. At Ram Orientation, you’ll meet with your assigned WCNR major advisor and register for classes. Be sure to complete any placement requirements prior to attending Ram Orientation.

3. Submit your final transfer transcripts to CSU prior to orientation.

4. If you have examination credit (AP, IB, etc.), please make sure to send your test scores from the testing agency directly to CSU prior to orientation. AP/IB test scores cannot be transferred from your previous institution to CSU and must be sent directly from the testing agency.

5. Complete your financial aid and health records requirements. Information about WCNR scholarships is available at: https://warnercnr.colostate.edu/scholarships-and-fellowships/.

6. Connect with Warner online:
   - Twitter – @warnercollege
   - Instagram – csuwarnercollege
   - Facebook – https://www.facebook.com/WarnerCollegeofNaturalResources/

7. If you’re admitted for the fall semester, plan to attend Ram Welcome to connect with other WCNR students and kick off the start of a new academic year!

8. Students who transfer to CSU from a Colorado Community College before earning the Associates degree should use the “Reverse Transfer” process to earn the Associates degree from their previous institution: degreewithinreach.org
