NINE MAJORS. ONE VISION. Warner College of Natural Resources offers nine undergraduate majors, giving students a variety of options to positively impact our world as natural resources professionals and leaders in their fields. It is routine for Warner students to get hands-on experience in research labs, working in the field, and studying abroad. The College has student organizations dedicated to a wide variety of environmental interests that support student development outside of the classroom.

HUMAN DIMENSIONS OF NATURAL RESOURCES

Become a leader in the conservation of our planet. Be the change agent that will communicate about natural resources and impact natural resources management and policy.

CAREERS

- Environmental Educator
- Advisor for Public Lands & Recreation
- City Planner

NATURAL RESOURCE TOURISM

Learn about tourism management, marketing and planning, natural resources, and social sciences to develop appropriate skills for managing recreation and tourism enterprises.

CAREERS

- Event Planner
- Director of Recreation Operations
- Marketing Manager

GEOLOGY

Develop and apply state of the art scientific methods to reveal Earth's geological, geophysical, hydrological, and environmental processes. Study these methods in the field around Colorado and beyond.

CAREERS

- Field Geologist
- Environmental Scientist
- Geospatial Technician

RESTORATION ECOLOGY

Become well versed in the biological, physical, and ecological science foundation of restoration ecology for damaged forest and rangeland ecosystems. Practice repairing and renewing our natural areas.

CAREERS

- Restoration Ecologist
- Wildfire Restoration Specialist
- Soil Scientist

WATERSHED SCIENCE

Water is a critical component of Earth's ecosystems and supports our daily lives in innumerable ways. As a Watershed Science student, you can make an impact by learning about the sustainable management of Earth's water resources.

CAREERS

- Watershed Restoration Specialist
- Water Resource Specialist
- Hydrologist

NATURAL RESOURCE MANAGEMENT

Explore the intersection of science and management and become knowledgeable in biological, physical and social sciences.

CAREERS

- Range Management Specialist
- Conservation Steward
- GIS Analyst

FOREST AND RANGELAND STEWARDSHIP

Cultivate your curiosity and join a renowned CSU legacy that continues to expand the wide scope of forest and rangeland stewardship. Diverse focus areas will prepare you to understand all aspects of these critical systems that sustain our lifestyles and livelihoods.

CAREERS

- Stewardship Forester
- Wildland Firefighter
- Range Management Specialist

FISH, WILDLIFE, AND CONSERVATION BIOLOGY

Conserve wildlife, fisheries, and habitats in ecosystems around the world through wildlife biology, conservation biology, and innovative approaches to addressing the human dimensions of wildlife conservation.

CAREERS

- District Wildlife Manager
- Wildlife Biologist
- Research Ecologist

ECOSYSTEM SCIENCE AND SUSTAINABILITY

Use scientific and quantitative analysis skills to address the world's most pressing environmental issues. Learn ecosystem ecology through multiple lenses that shape sustainability through addressing cultural, social, economic, and political aspects of environmental challenges.

CAREERS

- Corporate Sustainability Coordinator
- Environmental Consultant
- Environment and Energy Planner
