

CURRICULUM VITAE

Lee H. MacDonald

Professor Emeritus, Department of Ecosystem Science and Sustainability

Senior Research Scientist, Natural Resources Ecology Laboratory

Colorado State University, Fort Collins, CO 80523-1476

Phone: 970-215-5311

Email: lee.macdonald@colostate.edu

<https://www.nrel.colostate.edu/investigator/lee-macdonald-homepage/>

3213 Shore Road

Fort Collins, CO 80524

EDUCATION

1983-89 Ph.D. in Wildland Resource Science, Department of Forestry and Resource Management, University of California, Berkeley.

1976-77 German Academic Exchange Service (DAAD) fellowship, Faculty of Forestry, Universität Freiburg, West Germany.

1975-76 M.S. in Resource Ecology, School of Natural Resources, University of Michigan, Ann Arbor (degree received in 1981).

1970-74 B.A. in Human Biology, Stanford University, Stanford, California.

WORK EXPERIENCE

2012- Professor emeritus, Watershed Science Program, Dept. of Ecosystem Science and Sustainability, and Senior Research Scientist, Natural Resources Ecology Laboratory, Colorado State University, Fort Collins, CO. Responsible for initiating and conducting a variety of research and curriculum development projects, advising graduate students, teaching courses, and other tasks as needed.

1990-2012 Associate Professor and Professor, Watershed Science Program, Colorado State University, Fort Collins, CO. Research and teaching position in land use hydrology. Responsible for undergraduate courses in land use hydrology, watershed measurements, wetland science, and watershed problem analysis. Graduate courses include cumulative watershed effects and hillslope hydrology. Research interests include cumulative effects, wetland hydrology, monitoring, and land use effects on runoff and soil erosion.

1989-90 Research Coordinator, Center for Streamside Studies, University of Washington, Seattle, WA. Responsible for developing water quality monitoring guidelines for forested areas in the Pacific Northwest and Alaska. Products from this EPA-sponsored project include a 166-page monograph, an expert system, and a series of workshops throughout the western U.S.

1988-89 Associate, Philip Williams & Associates, San Francisco. Consultant in hydrology and land use. Responsible for projects on wetland delineation and restoration, soil moisture modeling, sediment transport, surface water-groundwater interactions, shallow groundwater monitoring, and flood-frequency determinations.

1984-88 Hydrologist, U.S. Forest Service PSW Research Station, Berkeley, CA. Designed and executed research project analysing the effects of forest harvest and cloud-seeding on late season snowmelt and runoff. Wrote hydrology portions of environmental assessments on the Sequoia National Forest.

1983-84 Research Assistant, Dept. of Forestry and Resource Management, University of California, Berkeley. Estimated amount and timing of potential water yield increases from National Forest lands in California.

1982-83 Consultant, United Nations University. Assisted in the formulation and execution of interdisciplinary research projects in western China and Nepal. Prepared report assessing activities resulting from 1977 U.N. Conference on Desertification.

1977-82 Programme Officer, Natural Resources Programme, United Nations University, Tokyo, Japan. Helped plan, establish, and evaluate research and training projects, primarily in developing countries. Organized

numerous technical meetings and conferences, and supervised twelve technical publications. Obtained funding to supplement core budget of approximately \$2 million.

- 1976-77 Helped write and edit U.N. Food and Agriculture Organization document "State of Natural Resources and Human Environment for Food and Agriculture".
- 1976 Research assistant, University of Michigan. Conducted ecological survey of a county park.
- 1974-75 Research assistant, Dow Chemical Company, Walnut Creek, CA.
- 1973 Congressional intern, U.S. House of Representatives, Washington, D.C.
- 1972-73 Research assistant, Stanford Research Institute, Palo Alto, CA.

AWARDS AND FELLOWSHIPS

Special Honorary Visiting Professor, Tokyo University of Agriculture and Technology, 2019.

Certificate of Appreciation, Vietnam National University of Forestry, Hanoi, 2019.

Affiliate faculty, Humboldt State University, 2017-present.

Affiliate faculty, Department of Geosciences, 2010-present.

Visiting researcher at the University of Valencia, Government of Spain, 2004-5.

Nominated for Best Teacher Award, Colorado State University, 1997.

Berg Fellowship, Soil and Water Conservation Society, 1994.

National Science Foundation/USGS Faculty Enhancement Workshop, 1991.

National Science Foundation travel awards, 1988 and 1989.

Colman Fellowship in Watershed Management, University of California, Berkeley, 1984-85 and 1985-86.

NATO Advanced Studies Institute "Recent Advances in Hydrologic Modeling", 10-23 July, Sintra, Portugal.

Professional Associate, East-West Center, 1978 and 1981.

German Academic Exchange Service Fellowship (DAAD), 1976-77.

California State Scholarships, 1970-74.

Undergraduate scholarships from Stanford University, Orowheat Baking Co., and Dow Chemical Co.

National Merit Finalist.

Numerous athletic awards (swimming, water polo).

PUBLICATIONS

1. Books and Monographs

RESEARCH AND TEACHING GRANTS

2021-2022: Evaluating hillslope soil erosion and forest recovery after tethered logging on steep slopes. USDA Forest Service Rocky Mountain Research Station, co-PI, \$24,398.

2020-2021: Sediment production rates over time in two sub-watersheds in Little River, NW CA. National Council for Air and Stream Improvement, PI, \$5000.

2018-2020: Developing a sediment budget over time for the Upper Elk River and Little River, California. National Council for Air and Stream Improvement, PI, \$21,617.

2017-2018: Quantifying sediment inputs from forest management activities: A case study from northwestern California. National Council for Air and Stream Improvement, PI, \$10,653.

2015-2018: Quantifying cumulative watershed effects over time in the Little River watershed, Humboldt County, Northwestern California. California Department of Forestry and Fire Protection, PI, \$71,180.

2014-2018: Sediment delivery to streams from fires and roads: Phase 1, 2, and 3. USDA Forest Service, PI, \$79,060.

2014-2017: Wildfire impacts on peak flows and sediment delivery: implications for irrigation infrastructure and management. USDA Agricultural Experiment Station, ~\$90,000, co-PI.

2013-2016: Collaborative research: spatial dynamics of burn severity and post-fire recovery in the High Park Fire area. National Science Foundation, \$817,355, Co-PI.

2013- 2018: Road sediment production and delivery: effectiveness of road decommissioning. Arapaho-Roosevelt National Forest, \$17,964, sole PI.

2012-2014: Evaluation of forest management effects in the Judd Creek watershed. Sierra Pacific Industries, \$72,357, sole PI.

2012-2013: RAPID response to the High Park Fire, Larimer County, Colorado. National Science Foundation, \$199,978, Senior Collaborator.

2011-17: Developing an advanced curriculum in Natural Resources Management at Vietnam Forestry University. Vietnam Forestry University and Vietnam Ministry of Education and Training. \$533,986, sole PI.

2009-11: Forests, water, land use, and climate change in the Mekong River Delta. Warner College of Natural Resources, \$8,565, sole PI.

- 2008-09: Development and teaching a lecture and a field-based course in hydrology, Vietnam Forestry University. U.S. Faculty Scholar grant, Vietnam Education Foundation, \$58,000, sole PI.
- 2008-09: Enhance the cooperation between WCNR and Vietnam Forestry University. Warner College of Natural Resources, \$6,830 plus \$6,830 from CSU International Programs, co-PI.
- 2007-2010: Sediment production and delivery: roads, hillslopes, and cumulative watershed effects. Sierra National Forest, \$124,973, sole PI.
- 2007-2010: Evaluating and predicting post-fire salvage logging effects on erosion. Joint Fire Science Program, \$286,504, co-PI.
- 2007-09: Road erosion, rehabilitation, and sediment and delivery. Lassen National Forest, \$73,715, sole PI.
- 2006-07: Upgrade and modernize the surface water monitoring station at the GetWET Observatory on Spring Creek. Co-PI with Dr. Sara Rathburn, \$9850 from Warner College of Natural Resources.
- 2005-07: Effects of thinning on hillslope and road sediment production. International Programs, USDA Forest Service, \$58,000. Sole PI.
- 2005-06: Cumulative watershed effects sediment prediction tools. USDA Forest Service Stream Team. \$10,008. Sole PI.
- 2004-2005: Comparison and analysis of post-fire erosion. Sabbatical grant, Ministry of Education and Science, Madrid, Spain. Co-PI with Dr. Artemi Cerda.
- 2003-06: Measuring and modeling the effectiveness of burned area emergency rehabilitation treatments. Joint Fire Science Program. \$357,000. Co-PI with Dr. Pete Robichaud, USFS.
- 2003-06: Monitoring and modeling cumulative watershed effects, USFS Region 5, Vallejo, CA. \$189,385. Sole PI.
- 2003-04: Monitoring erosion and rehabilitation treatments after the Hayman fire. Pike-San Isabel National Forest, Pueblo, Colorado. \$80,000. Sole PI.
- 2003-04: Effectiveness of a polyacrylamide (PAM) in reducing post-fire erosion. Soil Enhancement Technologies, Lakewood, CO. \$19,000. Sole PI.
- 2002-03: Academic Enrichment Program, CSU. \$155,650. Co-PI with Dr. Joyce Berry and others.
- 2002-05: Monitoring erosion after salvage logging on the Star fire, Eldorado National Forest and Placer County Water Agency. \$85,000. Sole PI.
- 2001-2006: Monitoring runoff and erosion in the Upper South Platte Protection and Restoration Project. U.S.D.A. Forest Service Inventory and Monitoring Program, Fort Collins, CO. \$240,711. Sole PI.
- 2001-2005: Fire, runoff, and erosion in forested areas: prediction and validation: Phase II. U.S. Environmental Protection Agency, Washington, D.C. \$48,849. Sole PI.
- 2001-2002: Water quality monitoring for Northern Colorado Plateau Parks: assessment and planning. National Park Service Water Resources Division, Fort Collins, CO. \$108,000. Co-PI with three other CSU faculty.
- 2002-03. Monitoring the effects of the Bobcat fire. U.S.D.A. Forest Service PSW Experiment Station. \$30,000. Sole PI.

- 2001-02: Hydrologic investigations at Bent's Old Fort National Historic Site, National Park Service, Fort Collins, CO. \$9,890. Sole PI.
- 2000-2002: Sediment production from forested areas in the Central Sierra Nevada. California Department of Forestry, Sacramento, CA. \$62,398. Sole PI.
- 2000-2001: Measurement and prediction of cumulative effects on the Eldorado National Forest. Eldorado National Forest, Placerville, California. \$30,000. Sole PI.
- 2000-2003: Monitoring runoff and erosion from the Bobcat Fire. Arapaho-Roosevelt National Forest, Fort Collins, CO. \$123,000. Co-PI with Dr. John Stednick.
- 2000-2001: Forest management, water yield and water quality: a state-of-the-art assessment. U.S. Geological Survey/Colorado Water Resources Research Institute, Northern Colorado Water Conservancy District, Colorado Water Conservancy District, and Denver Water Board. \$43,500. Dr. John Stednick as co-P.I.
- 1999-2000: Development of a spatially-explicit cumulative effects procedure using EUIs. U.S.D.A. Forest Service Pacific Southwest Forest and Range Experiment Station, Albany, CA. \$70,367. Sole PI.
- 1999-2003: Fire, runoff, and erosion in forested areas: prediction and validation. Office of Water and Watersheds, U.S. Environmental Protection Agency, Washington, D.C. \$63,748. Sole PI.
- 1999-2000: Delivery, deposition, and effects of land-based sediments on corals in St. John, U.S. Virgin Islands. Joint proposal with the University of the Virgin Islands to the U.S. Geological Survey/Water Resources Research Institute Regional Competitive Awards Program, \$23,325 (\$4,356 to CSU). Dr. Richard Nemeth, University of the Virgin Islands, as co-P.I.
- 1998-99: Assessment of cumulative effects on the Eldorado National Forest: Phase 1. Eldorado National Forest, Placerville, California, \$10,000.
- 1998: Collaboration on road erosion, monitoring, and cumulative effects, Cooperative Research Centre for Catchment Hydrology, CSIRO, Canberra, Australia. Sabbatical grant covered international airfare, local travel, and housing.
- 1998-99: Comparison of runoff processes on a tussock and pine hillslope, Glendhu, New Zealand. Landcare Research, New Zealand. NZ\$5000 plus airfare and expenses for a weeklong planning workshop in March 1997.
- 1997-99: Principles and guidelines for evaluating cumulative effects in forested watersheds. U.S. Environmental Protection Agency, Washington, D.C., \$85,856.
- 1997-99: Erosion and sedimentation on St. John, U.S. Virgin Islands. Joint proposal with the University of the Virgin Islands to the U.S. Geological Survey/Water Resources Research Institute Regional Competitive Awards Program, \$59,707 (\$33,703 to CSU). Dr. Henry Smith, University of the Virgin Islands, as co-P.I.
- 1997-98: Hyporheic zones in the McMurdo dry valleys, Antarctica. Travel, equipment, and field expenses for a graduate student and myself for a total of five person-months. National Science Foundation.
- 1997-99: Erosion and Sedimentation in Virgin Islands National Park. Water Resources Division, National Park Service, \$50,000.
- 1996-99: Hydrologic and ecologic effects of the Grand Ditch, Rocky Mountain National Park. National Park Service, \$74,800. Dr. David Cooper as co-P.I.

- 1996-97: Erosion and sedimentation on St. John (Phase II). Island Resources Foundation, National Biologic Survey, and others, approx. \$19,000.
- 1996-97: Effects of substrate on macroinvertebrate communities, Arapaho-Roosevelt National Forest. U.S. Forest Service, \$15,000.
- 1994-97: Effects of forest harvest on peak flows. Rocky Mountain Forest and Range Experiment Station, U.S. Forest Service, \$20,000.
- 1994-95: Analysis of water resource issues in Yosemite National Park. National Park Service, \$12,200.
- 1994-96: Stream channel processes at Squaw Creek and related stream systems technology. Rocky Mountain Forest and Range Experiment Station, U.S. Forest Service, \$55,450.
- 1994-95: Effects of water diversion on Upper Beaver Meadow, Rocky Mountain National Park. National Park Service, \$25,000. Dr. David Cooper as co-P.I.
- 1993-94: Rehydration of a drained wetland in Central Florida: Phase III. Anonymous, \$15,945.
- 1992-95: Instream flow protection in the Western U.S. Rocky Mountain Forest and Range Experiment Station, U.S. Forest Service, \$90,400.
- 1992-95: Validation of water yield thresholds. Kootenai National Forest, \$86,745. Dr. E. Wohl as co-P.I.
- 1992-93: Rehydration of a drained wetland in Central Florida: Phase II. Anonymous, \$31,972.
- 1992-94: Predicting soil erosion susceptibility on St. John, Virgin Islands. National Park Service, \$33,700.
- 1992-95: Cumulative effects and scale. Southern Forest Experiment Station, U.S. Forest Service, \$62,500.
- 1992-95: Hydrology of woody draws in the Northern Great Plains. Rocky Mountain Forest and Range Experiment Station, U.S. Forest Service, \$29,180.
- 1991-92: Rehydrating a drained wetland in Central Florida: Evaluation of hydrologic and chemical effects. Anonymous, \$31,197. Dr. J. Stednick as co-P.I.
- 1991-92: Validation of water yield thresholds. Montana Cumulative Effects Cooperative, \$25,000. Dr. E. Wohl as co-P.I.
- 1991-92: Water quality inventory and monitoring. Water Resources Division, National Park Service, \$22,832.

TEACHING

1. University Courses

- ER/WR 416: Land use hydrology (completely revised)
- ER/WR 417: Watershed measurements (completely revised)
- ER/WR 420: Watershed practicum (new course, team-taught)
- ER/WR 440: Watershed problem analysis (both individually and team-taught; completely revised)
- ER/WR 510: Watershed management in developing countries (completely revised)
- ER/WR 440: Watershed problem analysis (team-taught; completely revised my portion)
- ER/WR 516: Cumulative effects and watershed analysis (new course)
- ER/WR 616: Hillslope hydrology and runoff processes (new course)
- ER 684: Supervised college teaching

ER 692b: Hydrologic models used by land managers (new course)
 ER 692V: Seminar on riparian hydrology and ecological implications (new course with Dr. D. Cooper)
 ER 692V: Seminar on wetland hydrology (new course)
 NR 420: Integrated resource management (team-taught; completely revised my portion)
 NR 481: Wetland science (team-taught; new course);
 Special courses on hydrologic processes, watershed measurements, and watershed management in Vietnam and India;
 Numerous guest lectures, seminars, etc.

2. Theses supervised (currently advising one M.S. student)

- Sosa-Perez, G., 2016. Road sediment production and delivery: effects of fires, traffic, and road decommissioning. Ph.D. dissertation, 187 pp. plus appendices.
- Stafford, A.K., 2011. Sediment production and delivery from hillslopes and forest roads in the southern Sierra Nevada, California. M.S. thesis, 152 pp.
- Litschert, S.E., 2009. Predicting cumulative watershed effects in small forested watersheds. Ph.D. dissertation, 250 pp. plus app.
- Schaffrath, K., 2009. Post-fire erosion and recovery after two fires in the Colorado Front Range, 2002-2006. M.S. thesis, 147 pp. plus app.
- Brown, E.L., 2009. Sediment production from thinning and roads in the Colorado Front Range. M.S. thesis, 120 pp. plus app.

PROFESSIONAL SERVICE

1. Technical Committees and Reviews

Technical Committees:

National Academy of Sciences, *Committee on Hydrologic Impacts of Forest Management*, 2006-08.

Technical Committee to Assess *Western Washington Stormwater Management Manual*, Governor's Task Force on Salmon Recovery, State of Washington, 2004-05.

Technical Reviews:

Ambient Monitoring Study Plan, Timber-Fish-Wildlife Program, Olympia, Washington.

Biology and Earth Science proposals, PRAXIS XXI (joint U.S.-Portugal research program).

Book chapter, *Strategies for Restoring River Ecosystems*, American Fisheries Society.

Book chapter, *Watershed Management*, Springer-Verlag.

Book chapter, *Pacific Salmon and their Ecosystem*.

Book chapter, *Compendium of Forest Hydrology and Geomorphology in British Columbia*.

Book chapter, *Ecology and Management of Streams and Rivers in the Pacific Northwest Coastal Ecoregion*.

Book chapters (2), *Effects of Forest and Grassland Management on Drinking Water Quality for Public Water Supplies*, U.S.D.A. Forest Service.

Monitoring Protocols to Evaluate Water Quality Effects of Grazing Management on Western Rangeland Streams, U.S. EPA Region 10.

Methods for Evaluating the Effectiveness of Forestry Best Management Practices in Meeting Water Quality Goals or Standards, U.S.D.A. Forest Service.

National Forest Riparian and Aquatic Habitat Management Strategy (Fish 2000), Northwest Forest Resource Council.

Protocol for Developing Sediment TMDLs, Environmental Protection Agency.

Review of the *Draft Federal Long-term Monitoring Plan for the Colorado River below Glen Canyon Dam*, National Research Council.

Research proposal, Arizona Water Resources Research Center.

Research proposals, National Science Foundation.

Research proposals, New Zealand Foundation for Research, Science, and Technology.

Research proposals, Regional Competitive Grants Program, Western Region (Water Resources).

Research proposals, U.S. Department of Agriculture.

Research proposal, Wyoming Water Resources Research Center.

Shrub Control and Water Yield on Texas Rangelands: Current State of Knowledge, Texas Agricultural Research Station.

Reviewer for the following journals:

Australian Journal of Soil Science

Catena

Environmental Management

Forest Ecology and Management

Forest Science

Hydrological Processes

International Journal of Wildland Fire

Journal of the American Water Resources Association/Water Resources Bulletin

Journal of Arid Environments
Journal of Contaminant Hydrology
Journal of Environmental Quality
Journal of Hydraulic Engineering
Journal of Hydrologic Engineering
Journal of Hydrology
Journal of Hydrology(NZ)
Journal of Range Management
Mountain Research and Development
Water Resources Research
Western Journal of Applied Forestry
Wetlands

PROFESSIONAL ORGANIZATIONS (past or current member)

American Geophysical Union.
 American Water Resources Association
 European Geophysical Union
 International Association of Hydrological Sciences
 New Zealand Hydrological Society
 Society of American Foresters (Chairman, San Francisco Bay Area Chapter, 1989) (not currently a member)
 Society of Wetland Scientists
 Soil and Water Conservation Society
 Soil Science Society of America
 Watershed Management Council (Exec. Comm. 1989-90; editor of the Newsletter 1988-89)
 Western Snow Conference

CONSULTING (Selected)

British Columbia Ministry of the Environment
 California Department of Parks and Recreation
 Colorado Acequia Association
 Green Diamond Resource Company
 Humboldt Redwoods Company, LLC
 Ministry of Forests, New South Wales, Australia
 National Council of the Pulp and Paper Industry for Air and Stream Improvement
 National Park Service
 Northwest Forest Research Council
 Sierra Pacific Industries
 State of Washington
 United Nations Development Program
 U.S. Army Corps of Engineers
